

Manage competency and provide consistent, evidence-based care anywhere, anytime

Meeting the highest standards of safety and consistency is essential to the health of your patients — and your organization. But improving decisions at the point of care requires standardized education and that you provide nurses, therapists and other clinicians with access to best practices and the latest evidence-based information.

Elsevier's Clinical Skills combines competency management features with over 1,900 evidence-based skills and procedures to create a powerful resource that helps address the need for both care consistency and competency validation. It positions you in alignment with the latest professional guidelines and key standards of care — all of which allows you to improve practice and patient outcomes.

Clinical Skills is continuously updated in partnership with leading nursing organizations like AACN, ARN, A.S.P.E.N., ONS, and IAFN. Collections include Critical Care, Emergency and Maternal-Newborn, as well as specialties such as Home Health, Perioperative, Respiratory Care, Rehabilitation and Pediatric.

Integrate CE within your clinician's workflow

CE is available within the competency management workflow, allowing your clinicians to earn contact hours as they learn clinical skills and demonstrate competency. Clinical Skills CE follows ANCC educational design criteria and is included at no additional cost.

- **1,600+** Contact Hours* currently available
- Follows ANCC educational design criteria
- Saves time, money and more!

*Elsevier is accredited with distinction as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

Clinical Skills

Nurses and Other Clinicians

Enjoy an engaging learning experience that validates competency in over 1,900 evidence-based skills and procedures. Clinical Skills provides quick sheet summaries and in-depth descriptions with rationales, checklists, supply lists, competency tests for immediate feedback, videos, animated demonstrations and illustrations. You can refresh knowledge and learn new skills anytime. Content is available 24/7 and is continuously reviewed and updated to reflect the latest in evidence-based practice.

Clinical Educators and Administrators

Clinical Skills makes it easy to standardize, measure and document knowledge with powerful capabilities. It enables you to create learning modules with multiple types of content, including Skills, eLearning courses, discussions, presentations, PDF files and journal articles. What's more, you can deliver announcements, require an acknowledgement and analyze learning behavior with over 60 reports. With this level of customization and control, you can measure the competency of clinicians and take action to continually improve learning.

Healthcare Organizations

Consolidate resources and save on costs by integrating Clinical Skills into your organizational workflow and supplementing your institution's Policy & Procedure manuals. You can spread education across all shifts to balance training with unit coverage and hospital benefits. Clinical Skills helps you reduce recruitment and retention costs by investing in knowledge acquisition and satisfaction of existing clinicians. By offering CE as part of a skills activity, you can efficiently manage competency while demonstrating your commitment to their professional development.

Skills Include:

- Quick Sheet
- Illustrations
- Extended Text With References
- Demos (Videos/Animations)
- Required Supplies
- Competency Checklist
- Online Test

With Clinical Skills, you can easily add Elsevier's Clinical eLearning courses and access them through a single interface.

1,900+ evidence-based skills and procedures to validate staff competency
